

Global Environmental Policy

Blue Water Shipping is certified in accordance with ISO 14001 and therefore we focus on continuously reducing environmental impact on the basis of defined environmental targets.

Blue Water Shipping will ensure minimal impact on the environment by

- » Working target-oriented towards minimising environmental impact from day to day business
- » Influencing and motivating customers and suppliers to prioritise environmentally friendly transport solutions
- » Working to be at the forefront of environmental initiatives within the business, and build up knowledge and competencies to benefit our customers and their environmental image
- » Ensuring that existing legislation is observed
- » Emphasising and determining significant environmental aspects and targeting the effort to reduce these

To achieve this we will

- » As a minimum ensure compliance with international and local legislation
- » Implement a documented and certified environmental control according to ISO 14001:2015
- » Continuously carry out measures and follow up on environmental impacts
- » Set up goals for improvement and plans of action as well as making systematic follow-up on performance and results
- » Supervise the efficiency and adequacy of the environmental control system in relation to objectives and goals for improvement through internal audits and management review (performance review)
- » Prepare plans for environmental aspects in connections with projects or by client demand as well as documenting and controlling the process according to these

A handwritten signature in black ink, appearing to read 'Søren Nørgaard Thomsen'. The signature is stylized and fluid, written over a light grey background.

Søren Nørgaard Thomsen
CEO
